PROFESSIONAL SUMMARY

Technical Solutions professional with 8+ years of customer-facing experience spanning enterprise system integrations, complex data analysis, and cross-functional stakeholder consulting. Skilled in SQL, Python, REST APIs, web technologies, and translating technical findings into clear business decisions. Background includes managing large-scale data integrations, conducting exploratory data analysis, building KPI frameworks, and guiding clients through product adoptions and migrations. Completing an MS in Analytics (Applied Machine Intelligence) at Northeastern University, graduating 2026. Eager to deliver gTech Ads solutions that maximize partner ROI across Google's ad products stack.

TECHNICAL SKILLS

SQL / NoSQL (complex querying, large datasets) • **Python** (Pandas, NumPy, Scikit-learn, XGBoost) • **R** • **Web Technologies** (HTTP, REST APIs, XML) • **Tableau** • **Power BI** • **Looker Studio** • **Google Workspace** • **Hyland OnBase** • **Salesforce** • **Zendesk** • **Jira** (Atlassian) • **Git** • **Statistical Modeling** (Regression, Clustering, Forecasting) • **ETL Pipelines** • **Data Quality Audits** • **SHAP** / **XAI**

PROFESSIONAL EXPERIENCE

Cloud Analyst — Technical Solutions & Data Integration | Foundever (Hyland OnBase)

Aug 2023 – Aug 2024

- Served as primary technical consultant for enterprise-scale Hyland OnBase integrations, delivering documentation, troubleshooting guides, and hands-on client support to ensure prompt resolution of technical challenges.
- Administered and optimized complex data pipelines for a Fortune-client environment — conducting data-quality audits, resolving integrity issues, and guaranteeing downstream reporting accuracy for business stakeholders.
- Automated recurring validation workflows in Python and OnBase scripts, reducing manual processing by ~30%; presented solutions to internal and client stakeholders in clear, non-technical terms.
- Partnered cross-functionally with technical and business teams to analyze workflow requirements, develop scalable analytics-driven solutions, and guide clients through product upgrades and migrations.
- Recognized as Overall Best Analyst 2023–2024 and 4× Best Analyst for delivering measurable technical and data quality improvements.

Subject Matter Expert — Technical Support & Analytics | Concentrix (Roku)

Sep 2021 – Aug 2023

- Provided customer-facing technical consultation for a major streaming platform, diagnosing complex product integration issues and delivering actionable solutions across hundreds of weekly cases.
- Conducted exploratory data analysis on large support-ticket datasets to identify systemic failure patterns and audience behavior trends; findings fed directly into product team process improvements.
- Built KPI reporting frameworks and self-service dashboards from scratch, giving non-technical stakeholders weekly performance visibility — mirroring the data management and workflow guidance central to this role.
- Collaborated with sales and product partners to advocate new features and support client adoption of product upgrades, improving long-term partner success outcomes.

Customer Service Agent | Emirates Airlines

Mar 2019 – Mar 2021

- Managed real-time operational data entry and validation in a high-volume international environment; identified workflow friction points and contributed to process improvements that reduced handling time.

Banking Supervisor | GM Associates

Jan 2018 – Mar 2019

- Supervised financial transaction processing and reconciliations with zero audit exceptions; analyzed patterns to eliminate bottlenecks and improve team throughput.

SELECTED PROJECTS

Credit Card Fraud Detection (2025) — End-to-end ML pipeline (XGBoost, SMOTE, SHAP) on 577:1 imbalanced dataset; EDA, model development, and explainable AI outputs for non-technical stakeholders. **Founder Success Prediction** (2025) — Python ML models on LinkedIn/Crunchbase data with BI dashboards for VC decision support. **ESG Framework for AI Startups** (2024) — Scoring framework + Tableau dashboards aligned with EU AI Act, SASB, NIST.

EDUCATION

MS — Analytics (Applied Machine Intelligence), Northeastern University

Expected 2026

Relevant: Machine Learning, Risk Management Analytics, AI System Technologies, NLP, Time Series Forecasting

BS — Electronics Media, Hindustan College

2016
